Laos Flooding

By Tim Wallace | Sources: European Space Agency (satellite images), Global Disaster Alerting Coordination System

Leaderboard Calculations

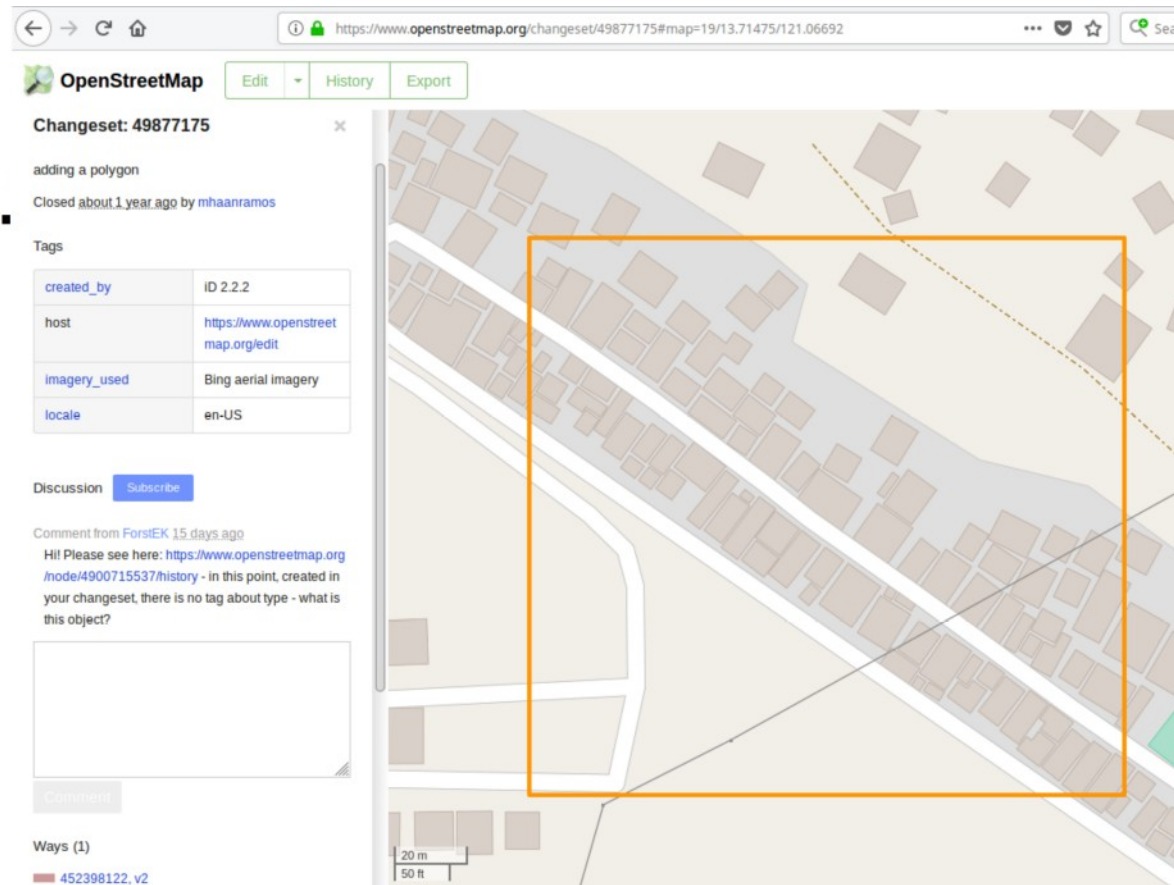

- **Total Edits** = buildings + POIs + roads + waterways
 - Linear features are counted once per feature edit or the full length when initially added
- **Buildings** = each building
- **POIs** = each POI
- **KM of Road** = road length in Km.

Tips & Tricks

Changesets – your edits

- All changes are visible to the public.
 - Respond to any feedback, or questions.

Changeset Comments

The image shows the 'Save Changes' interface on the OpenStreetMap website. On the left, a sidebar contains the 'Changeset comment' text area, which currently contains the text 'Digitize road detected by #improveosm. #pupsjcwts'. Below this is a link 'About changeset comments'. Further down, it says 'The changes you upload as **GOwin** will be visible on all maps that use OpenStreetMap data.' and has 'Cancel' and 'Save' buttons. At the bottom of the sidebar, under '1 Changes', there is a list item 'Modified Service Road'. On the right, a map view shows a satellite image with a white line representing a road and several black dots. A yellow callout bubble points to the changeset comment text area with the text: 'Describe the changes you made. Always add the #pupsjcwts hashtag'. The top of the map view has a toolbar with 'Point', 'Line', 'Area', undo, redo, and 'Save' buttons, along with a notification badge showing '1'.
